

# NEC4 FOR SITE TEAMS

## A PRACTICAL WORKSHOP TO UNDERSTAND NEC4

NEC Contracts have strict requirements for their administration and rely heavily on an accepted and up to date programme. This workshop gives delegates a practical understanding of their responsibilities when working with NEC4 and how to protect the interests of the business.

This is a two day workshop for those involved in projects using NEC4 contracts.

The workshop is ideal for

- Project Managers
- Site Agents
- Quantity Surveyors
- Engineers

Delegates are assessed throughout the workshop and then a case study is used at the end of the workshop to confirm the delegates understanding.

The course is delivered face to face on your premises.

Contact us today for more information or to book your training slot and gain higher performing teams in your business.

### The parties to the contract

An overview on the main parties to the contract and what their responsibilities are.

01

### Programmes & early warnings

Focus on programme requirements under NEC4 and the use of early warnings.

02

### Compensation events & payments

Reviewing how to administer compensation events, key timings, and the actions of each party. A look at the process for agreeing payments.

03

### Overview of other significant clauses

Guidance on other common clauses including communications, contractor's proposals, acceleration and quality management.

04

### A case study

A practical exercise in determining compensation event validity and reviewing the effects of other influencing factors post tender.
